Volume 241 August 1992

CONTENTS

Free-surface cusps associated with flow at low Reynolds number. J.-T. Jeong and H. K. Moffatt *page* 1

Geostrophic adjustment in a channel: nonlinear and dispersive effects. G. G. Tomasson and W. K. Melville 23

Natural convection and dispersion in a tilted fracture. Andrew W. Woods and Stefan J. Linz 59

Bursts and the law of the wall in turbulent boundary layers. J. F. Morrison, C. S. Subramanian and P. Bradshaw 75

Instability of unbounded uniform granular shear flow. S. B. Savage 109

Frictional–collisional equations of motion for granular materials and their application to flow in aerated shutes. P. Nott and R. Jackson 125

A comparison of the solutions of some proposed equations of motion of granular materials for fully developed flow down inclined planes. K. G. Anderson and R. Jackson 145

Nonlinear oscillations of viscous liquid drops. Osman A. Basaran 169

Magnetic field intermittency and fast dynamo action in random helical flows. Andrew D. Gilbert and B. J. Bayly 199

The shape of a magnetic liquid drop. O. E. Séro-Guillaume, D. Zouaoui, D. Bernardin and J. P. Brancher 215

Numerical experiments on two-dimensional foam. Thomas Herdtle and Hassan Aref 233

The interaction between a high-frequency gust and a blade row. N. Peake 261

Multiple equilibria in two-dimensional thermohaline circulation. Paola Cessi and W. R. Young 291

Water waves in shallow channels of rapidly varying depth. A. Nachbin and G. C. Papanicolaou 311

Uniformly travelling water waves from a dynamical systems viewpoint: some insights into bifurcations from Stokes' family. C. Baesens and R. S. MacKay 333

Jump conditions across normal shock waves in pure vapour–droplet flows. A. Guha 349

Vortex structure and dynamics in the near field of a coaxial jet. Werner J. A. Dahm, Clifford E. Frieler and Grétar Tryggvason 371

The effect of axial stretching on the three-dimensional stability of a vortex pair. J. S. Marshall 403

Parallel flow in Hele-Shaw cells. M. Zeybek and Y. C. Yortsos 421

On turbulent separation in the flow past a bluff body. A. Neish and F. T. Smith 443

The structure of a turbulent free shear layer in a rotating fluid. A. A. Bidokhti and D. J. Tritton 469

Stabilization and destabilization of turbulent shear flow in a rotating fluid. D. J. Tritton 503

Unsteady shock propagation in a steady flow nozzle expansion. R. J. Stalker and N. R. Mudford 525

Boundary conditions and linear analysis of finite-cell Rayleigh–Bénard convection. Yih-Yuh Chen 549

Plane turbulent jets in a bounded fluid layer. T. Dracos, M. Giger and G. H. Jirka 587

The nonlinear evolution of a slowly growing wave on a laterally sheared baroclinic flow. M. J. Bell 615

The energy decay in self-preserving isotropic turbulence revisited. Charles G. Speziale and Peter S. Bernard 645

Nonlinear dynamics in Langmuir circulations with $O(2)$ symmetry. Stephen M. Cox, Sidney Leibovich, Irene M. Moroz and Amit Tandon 669

An advanced experimental investigation of quasi-two-dimensional shear flows. F. V. Dolzhanskii, V. A. Krymov and D. Yu. Manin 705

Reviews

Topological Fluid Mechanics: Proceedings of the IUTAM Symposium, edited by H. K. Moffatt and A. Tsinober 723

Flow and Heat Transfer in Rotating-Disc Systems. Volume I. Rotor-Stator Systems, by J. M. Owen and R. H. Rogers 724

Foundations of Statistical Mechanics. Volume II. Nonequilibrium Phenomena, by W. T. Grandy 725
